

AEROTM DIAGNOSTIC

Non-Contact Forehead Infrared (IR) Thermometer for temperature measurement

Zero Touch, Zero Contamination

The AeroDiagnosticTM range offers a selection of commonly used diagnostic supplies in the healthcare industry. AeroDiagnosticTM Non-Contact Forehead IR Thermometers ensure accurate and stable body temperature readings, without the need for physical contact from a distance of around 5cm. Simply point the thermometer towards the forehead to read the temperature shown on the LCD screen. Specially designed to take the body temperature of a person regardless of room temperature.

Technical Specifications:

- Medical Grade Infrared Thermometer
- Highly Sensitive Infrared Probe
- Non-Contact 1 Second Measure
- LED Display
- Automatic Shutdown
- Accurate Temperature Measurement Within 5cm
- High Temperature Warning
- 32 Groups of Memory
