

BLOOD BORNE PATHOGENS

10 SERIES KIT

Assists in compliance with OSHA 29 CFR1910.1030 regulations

Surefill™ Blood Borne Pathogens 10 Series Kit has been designed to cater for all blood borne related spills in the workplace. A blood borne spill is an unintended release of a potentially infectious material. Proper response to such incidents ensures employee safety while reducing environmental contamination concerns. With the unique four pouch refill the items are kept organized and easily accessible in the event of a spill. A quality, wall mountable weatherproof case ensure the contents are protected from water, dust and other demanding conditions. With three sizes there is a solution for small workplaces to large industrial environments.
